PROMOTING WOMEN IN AND JOINING CYBERSECURITY

Women Cyber Force sets the ambitious, but at the same time more than urgent, goal to leverage the role of girls and women in this sector, support them in choosing their career in ICT in their best interest.

We want to create long lasting career choices for women, either via mentoring and empowering or via keeping a network for future work opportunities within the field and helping each other.

We believe in the next generations to come, in their diversity, newly acquired skills, their capacities, abilities, competencies.

We believe that if new generations of females believe in themselves and acquire that self-confidence, then: the sky is the limit and the gender gap in cybersecurity world is the word of past.
